SUBJECT INDEX PLASMA WAVES

PLASMA CONTROL Linear analysis of the double-tearing mode in	PLASMA HEATING CT-6 tokamak research - Development and test
tokamak discharges	operation of the experimental device
Neutral-beam energy and power requirements for expanding-radius and full-bore start-up of	p0718 A60-44343 On fusion alpha-particle heating of plasma below ignition
tokamak reactors	p0718 A80-44429
p0719 A80-44656 Particle confinement scaling experiments in the Culham Levitron	Particle confinement scaling experiments in the Culham Levitron p0719 A80-44657
p0719 A80-44657 Combined n equal to 0 and n not equal to 0 MHD	Transport code simulations of lower hybrid heating in tokamaks
stability analysis of axisymmetric surface current model equilibria p0719 A80-44659	p0719 A80-44664 Nonlinear coupling of the slow wave structure with the lower-hybrid waves near the plasma surface
The Tandem Hirror Fusion Test Facility p0720 A80-45850	in controlled fusion p0720 A80-45291
Porm factor for certain types of toroidal solenoids in tokamak fusion devices p0721 A80-47230	Effects of microwave beams on the ionosphere p0757 A80-46881
The Spheromak fusion reactor	A model for laser driven ablative implosions p0735 A80-49069
p0733 A80-48495 An engineering development plan for inertial confinement fusion	Parametric excitation of ion quasi-mode by the pump near the ion cyclotron frequency plasma heating in tokamaks
p0733 A80-48496	p0736 A80-49072
Alteration of Pfirsch-Schlueter transport in tokamaks by all four external sources p0735 A80-49058	Magnetic-pressure acceleration of cylindrical liners by the pulse generators for relativistic electron beams
Bifurcation of sharp boundary beta=1 multipole equilibria plasma confinement in tokamaks	p0736 A80-49098 Some perspectives on the use of powerful gyrotrons
PLASMA CURRENTS	for the electron-cyclotron plasma heating in
CT-6 tokamak research - Development and test	large tokamaks p0738 A80-51038
operation of the experimental device	Economics of shale oil production by radio
p0718 A80-44343 Combined n equal to 0 and n not equal to 0 MHD	frequency heating [UCRL-52942] p0710 N80-32566
stability analysis of axisymmetric surface	PLASMA INTERACTIONS
current model equilibria p0719 180-44659	The feasibility of pellet re-fuelling of a fusion reactor
Bnd effects in a MHD channel with diverging electrode walls	p0719 A80-44661
p0738 A80-50948	Contribution to the theory of the free-field
PLASMA DIAGNOSTICS The Tandem Birror Fusion Test Facility	induction-type MHD engine p0736 A80-49414
p0720 A80-45850 CT-6 tokamak research. II - Experimental results p0721 A80-46670	PLASHA RADIATION  Observations of fluctuating omega sub p emission in Alcator tokamaks
Instability analysis in a nonequilibrium MHD	p0736 A80-49075
generator Thesis p0737 180-50357	PLASMA RESONANCE Destabilization of drift-universal eigenmodes by
PLASMA DIFFUSION	toroidal effects
Particle confinement scaling experiments in the Culham Levitron	PLASHA SHRATHS
p0719 A80-44657 Characterization of open-cycle, coal-fired MHD	Cathode sheaths in potassium seeded MHD combustion plasmas
generators [ARI-RP-46] p0751 N80-32234	p0720 A80-46158 A computer model of solar panel-plasma interactions
PLASHA BLECTRODES	[ MASA-CR-160796 ] p0650 N80-32853
Heat flux at the thermionic collector p0732 A80-48477	PLASMA SLABS Nonlinear coupling of the slow wave structure with
End effects in a MHD channel with diverging electrode walls	the lower-hybrid waves near the plasma surface in controlled fusion
p0738 A80-50948 End zone of a frame-type channel with an	p0720 A80-45291 PLASHA SPECTRA
inhomogeneous flow current and potential fields in plasma	Use of generalized population ratios to obtain Fe XV line intensities and linewidths at high
PLASMA BQUILIBRIUM	electron densities p0735 A80-48763
Energy principle with global invariants for toroidal plasmas	Density profiles in tokamaks from electron cyclotron radiation spectra
p0717 A80-43973 Combined n equal to 0 and n not equal to 0 MHD	p0738 A80-51018
stability analysis of axisymmetric surface current model equilibria	Plasma-sprayed coatings for very high temperature solar absorbers
p0719 A80-44659 Eigenvalue bounds for Bill's equation in	[CONF-791021-3] p0631 #80-28875 PLASMA TEMPERATURE
stability theory for magnetohydrodynamic equilibria	Transport code simulations of lower hybrid heating in tokamaks
p0720 A80-45851 Bifurcation of sharp boundary beta=1 multipole	p0719 A80-44664
equilibria plasma confinement in tokamaks	PLASHA WAVES Nonlinear coupling of the slow wave structure with
p0736 A80-49074	the lower-hybrid waves near the plasma surface
Grad B focusing and deposition of relativistic	p0720 A80-45291
electron beams p0717 A80-43972	Parametric decay into ion cyclotron waves and drift waves in multi-ion species plasma
PO 11 ROV-433/2	p0735 A80-49071

## SUBJECT INDEX

PLASHA-BLECTROMAGNETIC INTERACTION	
	Application of the lime/limestone flue gas
Effects of microwave beams on the ionosphere	desulfurization process to smelter gases
p0757 A80-46881	p0576 180-53084
Theoretical multiple beam overlap from channel transport of intense particle beams	Design of land-based, foam OTEC plants for
p0735 A80-49067	bottoming cycles [CONF-790631-17] p0742 N80-28913
PLASEA-PARTICLE INTERACTIONS	Advanced combustion systems for stationary gas
on fusion alpha-particle heating of plasma below	turbine engines. Volume 2: Bench scale
ignition .	evaluation
p0718 A80-44429	[PB80-175607] p0744 N80-29922
Alteration of Pfirsch-Schlueter transport in	Energy/Environment 4: Proceedings of the National
tokamaks by all four external sources	Conference on the Interagency Energy/Environment
p0735 A80-49058	R and D Program [PB80-177942] p0581 N80-29928
Theoretical multiple beam overlap from channel transport of intense particle beams	[PB80-177942] p0581 H80-29928 Pilot scale combustion evaluation of waste and
p0735 A80-49067	alternate fuels, phase 3
Relativistic-electron-beam/target interaction in	[PB80-177413] p0702 N80-30952
plasma channels	Photochemical study of NCx removal from stack gases
p0735 A80-49068	[PB80-181274] p0582 N80-30966
A computer model of solar panel-plasma interactions	Potential of diesel engine, 1979 summary source
[NASA-CR-160796] p0650 N80-32853	document
PLASMAS (PHYSICS)	[PB80-193659] p0585 N80-32734
Characterization of open-cycle, coal-fired MHD generators	Potential of diesel engine, emission technology [PB80-192685] p0586 N80-32735
[ARI-RP-43] p0750 N80-31936	[PB80-192685] p0586 N80-32735 Environmental implications of electric utility
PLASTIC TAPES	supply plans, 1978-2000
Bending behavior of lapped plastic RHV cables	[PB80-192156] p0588 N80-32963
[BNL-27331] p0760 N80-32789	Environmental control technology for carbon dioxide
PLATES (STRUCTURAL MEMBERS)	[DOE/EV-0079] p0588 N80-32972
Dynamics and control of a continuum model for a	Methanol/ethanol/gasoline blend fuels
solar power system	demonstration with stratified charge engine
[AIAA 80-1740] p0757 A80-45534	Vehicles -0743 mon 22666
PLUMBS Sulfate aerosol production and growth in	[PB80-192123] p0713 H80-33606 International Conference on Air Pollution, volume 1
coal-operated power plant plumes	[ISBN-0-7988-16651] p0592 N80-33929
p0572 A80-48533	Energy conservation-air pollution abatement project
Conversion of mitrogen oxide gases to mitrate	p0592 N80-33939
particles in oil refinery plumes	Energy: Careful conservation or regulated waste
p0572 A80-48534	control of automobile exhaust emissions
Pormation of sulfate particles in the plume of the	p0592 N80-33951
Four Corners Power Plant	International Conference on Air pollution, volume 4
PLUTORIUM p0576 A80-51660	p0592 N80-33954
Assumptions and ground rules used in nuclear waste	Environment: The energy connection p0592 N80-33955
projections and source term data	Environmental air quality control from the inside
[ONWI-24] p0585 N80-32203	looking out
PHEUMATIC CIRCUITS	p0592 N80-33960
Benefits arising from the use of pneumatic energy	Air Pollution control device configurations
transmittal in wind-power systems	[PB80-193253] p0593 N80-33972
PREUMATIC EQUIPMENT	POLLUTION MONITORING
	Sulfate aerosol production and growth in
Comparative study of the energy characteristics of	coal-operated power plant plumes
Comparative study of the energy characteristics of powered hand tools. Part 2: Investigation	coal-operated power plant plumes p0572 A80-48533

SOLAR CRILIS SUBJECT INDEX

Potential use of terrestrial photovoltaics for Effect of laser irradiation on the characteristics of implanted layers for silicon solar cells future space solar arrays p0602 A80-46711 p0658 N80-33882 Efficient thermal cycling of solar panels in solar simulation facilities with a multi-panel test rig Study of sandwich type glass encapsulation --- of solar cells p0659 N80-33898 p0602 A80-46714 Optimization studies of materials in hydrogenated An evaluation of spectrally selective reflectors (cold mirror membranes) for use with concentrator solar arrays amorphous silicon solar cells p0602 A80-46717 p0659 N80-33900 Evaluation of multijunction structures using amorphous Si-Ge alloys --- for solar cells SOLAR CELLS A proposed slotted mask for direct deposition of p0602 A80-46719 metal contact pattern on MIS solar cells Schottky barriers on sputtered hydrogenated amorphous silicon - Photovoltaic properties and p0595 A80-45119 A multiple p-n junction structure obtained from as-grown Czochralski silicon crystals by heat treatment - Application to solar cells capacitance-voltage characteristics p0602 A80-46720 Contact formation, scaling and optimisation of large-area R.P. sputtered a-Si Schottky barrier p0595 A80-45121 Economic requirements for new materials for solar solar-cells photovoltaic cells p0602 A80-46721 The stability of amorphous silicon Schottky-barrier solar cells p0596 A80-45317 Production of photovoltaic devices
[ASME PAPER 79-SOL-8] p0596 A80The spectral response of CdS:Cu/x/S solar cells p0596 A80-45662 p0602 A80-46722 Interface recombination and junction field studies formed by dry barrier techniques in the Cu2S-CdS solar cell p0597 A80-46251 EBIC and capacitance measurements on Cu2S-cds solar cells - Stability problems --- Electron Beam Induced Current A solar thermophotovoltaic converter D0597 180-46256 MIS and SIS solar cells on polycrystalline silicon p0597 A80-46257 p0603 A80-46725 Theory of polycrystalline silicon solar cells -Effect of reduction in grain boundary Optimal material properties for CdS/Cu2S solar cells p0603 A80-46726 recombination states Thin film /CdZn/S for solar cells p0603 A80-46727 p0597 A80-46258 Selenium heterostructure solar cells Progress in the development of the thin film MIS solar cell based on CdSe p0598 A80-46259 Conduction in sputtered a-Si-H Schottky-barrier D0603 A80-46728 solar cells Photoelectrochemical solar cells p0603 A80-46730 p0598 A80-46475 High-efficiency InP homojunction solar cells CdTe homojunctions solar cells p0598 A80-46496 p0603 A80-46731 Photovoltaic Solar Energy Conference, 2nd, Ber. West Germany, April 23-26, 1979, Proceedings 2nd, Berlin, Concentration and temperature performances of Gals-Gallas solar cells P0600 A80-46694 p0603 A80-46734 New experimental evidence for minority carrier MIS diodes --- for solar cells Photovoltaic power generators in space p0604 A80-46735 D0600 A80-46695 Pulsed measurement of solar cell spectral response The influence of grain size and dopant F0604 A80-46737 concentration on the electrical properties of A low cost solar simulator for testing polycrystalline silicon films photovoltaic terrestrial solar power cells and p0600 A80-46696 modules P0604 A80-46738 Comprehensive explanation of efficiency limits in Photovoltaic generators using optical concentration silicon solar cells p0600 A80-46697 p0604 A80-46739 Technology and economics of starting materials for Operation of multi-bandgap concentrator cells with low-cost silicon solar cells a spectrum splitting filter --- photovoltaic D0600 A80-46698 conversion efficiency Progress on the Dow Corning process for p0604 A80-46740 solar-grade silicon Solar cells with concentrating collectors and p0600 A80-46699 integrated heat use system Low-cost, high-efficiency silicon by heat exchanger method and fixed abrasive slicing p0604 A80-46742 Research issues for low cost photovoltaic cells technique --- for solar cells p0605 A80-46748 p0600 A80-46700 Numerical modelling of a solar cell in three Early assessment of the photovoltaic potentialities of RAD polysilicon sheets dimensions p0605 A80-46749 P0600 A80-46701 Theoretical performance of multi-layer grid Low cost crystalline silicon --- for solar cells p0600 A80-46703 patterns for solar cells p0605 A80-46752 Survey of semiconductor combinations for optimum Ion implanted solar cells from EPG silicon ribbons Epitaxial Film Growth heterojunction thin film solar cells p0605 A80-46753 p0601 A80-46705 Experimental optimization of the efficiency of n/+/-p-r/+/ and p/+/-n-n/+/ silicon solar cells Semiconductor-electrolyte solar cells for the photoelectrochemical reduction of carbon dioxide p0601 A80-46706 to organic fuel A high volume process for silicon solar cells using solid diffusion sources p0605 A80-46755 Some characteristics of low-cost silicon sheet p0601 A80-46707 p0605 A80-46756 A new diffusion process for silicon solar cells p0601 A80-46708 Degradation effects in silicon Schottky barrier Low cost processes for silicon --- fabricated for solar cells p0606 A80-46757 On the effects of boron and phosphorus primary p0601 A80-46709 impurities in p-type silicon material for solar Advanced thin silicon solar cell with controlled optical absorptance --- for space power systems cells p0606 A80-46758 Improvement of phosphorus diffused silicon solar and arrays p0601 A80-46710 cells by laser treatment D0606 A80-46763

SOBJECT INDEX SOLAR CELLS COETD

Influence of the double exponential on the efficiency and the yield of screen printed solar cells --- energy conversion effectiveness

p0606 A80-46764 A computer model for polycrystalline Si n/plus//p solar cells

p0606 A80-46766

High efficiency silicon solar cell for concentrator systems

p0606 A80-46767

High efficiency transcells and vertical multijunction cells for double-sided concentrated illumination

p0606 A80-46768

Advances in theory, fabrication and applications of bifacial solar cells D0606 A80-46769

Integrated Cu2S-CdS thin film solar cell generator P0606 A80-46770

A preliminary 'test case' manufacturing sequence for 50 cents/watt solar photovoltaic modules in

p0607 A80-46771

Model for the photovoltaic effect in Cu2S-CdS solar cells in the backwall configuration P0607 A80-46775

Photon loss analysis and design of thin-film planar junction Cu2S/CdS devices

p0607 A80-46776 Optical and calorimetric measurements of cupreous sulphides thin films --- for solar cells

D0607 A80-46779 Preparation and analysis of Cu20 thin-film solar

p0607 A80-46781 Accurate computer analysis of solar cells

including band-gap variation - Application to the Al/x/Ga/1-x/AsGaAs structure D0607 A80-46782

Efficient Gals shallow-home junction solar cells on single-crystal GaAs and Ge substrates

p0608 A80-46783 On the influence of an interfacial oxide layer on Au/n-GaAs Schottky barrier solar cells

p0608 A80-46784 Alsb as a candidate material for photovoltaic

solar energy conversion

Determination of the spectral distribution of global radiation with a rapid spectral radiometer and its correlation with solar cell efficiency

p0608 A80-46789 Influence of meteorological conditions on the design of solar energy dc-ac inverters

p0609 A80-46795 Operational characteristics of a 60 kW photovoltaic system integrated with a utility grid p0609 A80-46797

Radiation effects on solar cells

p0609 A80-46894

Environmental protection of the solar power satellite

D0609 A80-46899 I-V relationship for the Cu2S/CdS solar cell p0609 A80-46937

Limiting efficiencies of ideal single and multiple energy gap terrestrial solar cells p0609 A80-46951

High-efficiency AlGaAs/GaAs concentrator solar cells by organometallic vapor phase epitaxy p0610 A80-46952

Photoelectrochemical investigation on trigonal selenium film electrodes

p0610 A80-47139 Theoretical investigations into collection

coefficient for Cu/2-x/S-CdS cells with allowance for surface states at interface p0610 A80-47151

Solar cells for terrestrial applications p0611 A80-47156 Investigation of high-voltage heterophotoconverters

p0611 A80-47163 Surface passivation of inversion layer m.i.s. solar cells

p0612 A80-48150

Computer simulation of solar panel voltage regulation

D0612 A80-48177 GaAs solar cells for space applications

p0613 A80-48203 Effects of thermal annealing on the deep-level defects and I-V characteristics of 200 keV proton irradiated AlGaAs-GaAs solar cells

p0613 A80-48204 The planar multijunction cell - A new solar cell for earth and space

p0613 A80-48205 The applicability of DOE solar cell and array

technology to space power p0613 A80-48206

High-efficiency concentration/multi-solar-cell system for orbital power generation

p0614 A80-48207 Solar thermophotovoltaic space power system p0614 A80-48208

Concentrating photovoltaics - A viable candidate for the next generation of Air Force satellite pover systems .

p0614 A80-48209 Concentrator-enhanced photovoltaic arrays for deep space applications

D0614 A80-48210 Heat-rejection design for large concentrating

solar arravs p0614 A80-48211 Design and flight performance of the Pioneer Venus

Multiprobe and Orbiter solar arrays p0614 A80-48212 Insat-I solar array - Design and development summary

p0615 A80-48213 Large area flexible solar array design for Space Shuttle application

p0615 A80-48214

The 100-kWp photovoltaic power system at Natural Bridges National Monument

p0615 A80-48227 Residential photovoltaic systems costs p0615 A80-48229

Intermediate load-center photovoltaic application experiments

p0615 A80-48230 Photovoltaic central station applications - Status

and prospects p0615 A80-48231

470-kw photovoltaic power system for Saudi Arabia villages p0616 A80-48232

High performance photovoltaic systems p0616 A80-48233

Electrical power system for the SBS communication satellite

p0617 A80-48309 Thin film solar cells

p0619 A80-48513 Photo-intercalation - Possible application in solar energy devices

p0620 A80-48548 Current status of growth processes for solar grade

p0620 A80-48789 Photovoltaic conversion - Recent progress in solid

state solar cells Photoreduction of carbon dioxide and water into

formaldehyde and methanol on semiconductor materials

Optimized grid patterns for Cu2S-CdS solar cells p0621 A80-49322 Electrowinning of silicon from K2SiF6-molten

fluoride systems p0622 A80-50510

Amorphous silicon solar cells

p0622 A80-50625

Concentrators and solar photovoltaics

solar cells.

p0622 A80-50626 Theoretical analysis of new wavelength-division solar cells

p0622 A80-50745 Short circuit current in indium tin oxide/silicon

p0622 A80-50752 Open-circuit voltage of induced-junction solar cells p0622 180-50758 SOLAR COLLECTORS SUBJECT INDEX

Degradation of solar cell performance by areal inhomogeneity	Amorphous thin films for solar-cell applications [DOB/ET-21074/4] p0653 B80-32921

#### Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The issue, page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of Energy. If applicable, a report number is also included as an aid in identifying the document.

The potential of energy farming for transport fuels in New Zealand
[PB80-154248] p0693 880-
            [PB80-154248] p0693 880-28572
The potential of energy farming for transfort
```

The potential of energy farming for transport fuels in New Zealand, appendices [PB80-159255] p0693 N80-28 WASHINGTON STATE UNIV., PULLHAM.

Comparison of coal-fired power systems in waste heat applications in Tacoma, Washington [TID-29379] p0693 N80-28

p0693 N80-28573

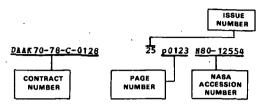

p0693 N80-28858

# CONTRACT NUMBER INDEX

ENERGY / A Continuing Bibliography (Issue 28)

JANUARY 1981

#### Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the IAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in either the IAA or STAR section. Preceding the accession number are the issue and page number in the particular supplement in which the citation may be found.

# REPORT/ACCESSION INDEX

#### ENERGY /A Continuing Bibliography (Issue 28)

JANUARY 1981

## Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (\*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

#### PUBLIC COLLECTIONS OF NASA DOCUMENTS

#### **DOMESTIC**

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

**CALIFORNIA** 

University of California, Berkeley

**COLORADO** 

University of Colorado, Boulder

DISTRICT OF COLUMBIA

Library of Congress

GEORGIA

Georgia Institute of Technology, Atlanta

ILLINOIS

The John Crerar Library, Chicago

**MASSACHUSETTS** 

Massachusetts Institute of Technology, Cambridge

**MISSOURI** 

Linda Hall Library, Kansas City

**NEW YORK** 

Columbia University, New York

**OKLAHOMA** 

University of Oklahoma, Bizzell Library

PENNSYLVANIA

Carnegie Library of Pittsburgh

WASHINGTON

University of Washington, Seattle

NASA publications (those indicated by an "\*" following the accession number) are also received by the following public and free libraries:

**CALIFORNIA** 

Los Angeles Public Library San Diego Public Library

COLORADO

**Denver Public Library** 

CONNECTICUT

Hartford Public Library

**MARYLAND** 

Enoch Pratt Free Library, Baltimore

**MASSACHUSETTS** 

**Boston Public Library** 

**MICHIGAN** 

**Detroit Public Library** 

MINNESOTA

Minneapolis Public Library and Information

Center

**NEW JERSEY** 

Trenton Public Library

**NEW YORK** 

Brooklyn Public Library

Buffalo and Erie County Public Library

Rochester Public Library

New York Public Library

OHIO

Akron Public Library

Cincinnati and Hamilton County Public Library

Cleveland Public Library

Dayton Public Library

Toledo and Lucas County Public Library

**TEXAS** 

Dallas Public Library

Fort Worth Public Library

WASHINGTON

Seattle Public Library

WISCONSIN

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

#### **EUROPEAN**

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in STAR. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "\*", from: ESA Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 7,5738 Paris CEDEX 15, France.
